IGNITE

Ignite is a Services Disabled Veteran Owned Small Business (SDVOSB) headquartered in Huntsville AL. We are ISO 9001:2015 and CMMI Services Level 3 certified. One of Inc. Magazine's 100 Fastest Growing Aero Defense Service Firms, Ignite is Fueling Innovation in multiple computer, technology and engineering services for the Department of Defense, US Army, US Air Force, NASA and Education customers.

SYSTEMS AND SOFTWARE ENGINEERING

Ignite provides systems and software engineering support to DoD and NASA customers for enterprise systems that support more than 75,000 users worldwide.

MODELING & SIMULATION ANALYSIS

Ignite builds modeling and simulation scenarios to support user research and training needs at White Sands Missile Range.

INFORMATION TECHNOLOGY

Ignite provides services to operate, maintain and enhance key business and mission-supporting platforms, applications and infrastructure for NASA and DoD customers.

LOGISTICS

Ignite delivers support for Logistics Engineering software tools for DoD and integrated Logistics support for the International Space Station.

International Space Station

Ignite provides support to several service areas within the Integrated Logistics Support (ILS) group: Materials Management, Depot Maintenance and Repair, Obsolescence, Mission Evaluation Room console, Supportability Analysis, Property Management, and Life Cycle integration. Ignite conducts analysis of logistics requirements to support on-orbit vehicles. Analyses includes up/down mass requirements, crew time requirements, maintenance backlog and functional availability of on-orbit systems. We perform trade studies to evaluate system architecture changes, proposed cargo carriers and flight support equipment, spares procurements, and depot repair capabilities. We coordinate modeling assumptions relating to subsystem architecture, functional impacts and objectives with appropriate subsystem teams. Ignite supports trade studies and analysis on International Space Station (ISS) hardware in support of spares procurement and/or ground depot repair capability. We maintain team schedules and provide support in establishing supportability plans for each flight ORU maintained by Boeing Integrated Logistics Support (ILS).

Ignite Logistics Excellence

Ignite provides IT support for Logistics Engineering software tools and analytical logistics for the International Space Station.

US Air Force Transportation Family of Systems

Ignite provides business process analysis, application development and maintenance, help desk and training services for the Transportation Family of Systems for the Air Force. We reinforce the strong team dynamics that are in place today and focus on Agile and DevSecOps methodologies to strengthen the team's effectiveness, improve software delivery, and increase process efficiency.

US Army Logistics Data Analysis Center

Ignite's Program Manager is the Deputy Program Manager (DPM) for the entire \$240M effort. Ignite provides comprehensive technical and IT support services for the US Army Logistics Engineering Center, which supports all logistics functions for the US Army. In addition to designing, developing, and maintaining a robust and secure enterprise-level architecture, we are also responsible for managing, upgrading, and developing custom applications for the Logistics Information Warehouse (LIW), one of the largest portals in the US Army inventory, currently containing 197 custom applications to support user requirements. Ignite provides help desk Tier 1 support providing state-of-the-art solutions in response to inquiries from the organization's computer users.

Complexity/Geographically disperse locations: Ignite's DPM supports the Project Management Office. The Ignite team has extensive responsibility to the overall performance of the contract which includes 306 personnel, in 8 geographical locations, supporting over 327 Government customers locally at Redstone Arsenal and 75,000 customers worldwide that are supported 24x7.
